

Ecology | Environmental Policy | Habitat Management

Senior Bat Ecologist: Scotland

MacArthur Green is a rapidly growing specialist ecological consultancy. Our team encompasses a diverse and unique skill set, providing high quality ecological advice to the renewable energy market.

We specialise in the provision of ecological and ornithological services throughout the United Kingdom. Our projects include work within the sectors of onshore wind, marine, offshore wind, hydro, transmission lines. We are also privileged to be asked to write guidance for statutory consultees.

We require a **senior bat ecologist** to join our team during this exciting period of growth.

Responsibilities

- Heading up our bat project work throughout the UK;
- Leading the field survey team in undertaking bat surveys;
- Working as part of the wider team to deliver other ecological survey work;
- Managing and reviewing the data analysis process;
- Preparation of Technical Reports;
- Provision of bespoke technical advice;
- Preparation of Environmental Statement chapters; and
- Project Management.

Skills & Experience Required

- The successful candidate will be educated to at least degree level in ecology, or a related subject;
- A minimum of 3 years' relevant experience of bat work;
- A comprehensive understanding of bat survey design, implementation and data analysis will be required (including:

remote activity surveys, manual activity surveys, emergence/re-entry surveys, roost surveys and use of sound analysis software);

- A bat licence will be highly desirable;
- A valid driving licence will be required.

Location

MacArthur Green is based in Glasgow, however, flexible working arrangements will be considered.

Salary: £27,000 to £35,000 dependent on skills and experience.

Please send a CV, detailing relevant skills and experience to jobs@macarthurgreen.com.
