

OUR PURPOSE

MacArthur Green's purpose is to help our clients successfully deliver logistically and technically complex projects.

We do this by combining:

- Consistently high quality of deliverables and service;
- robust science and methods;
- a sound understanding of the commercial requirements of projects; and
- lean business and data processes.

OUR VISION

We help clients to deliver complex projects so that the best outcome is achieved for economic development and the environment, with respect to current and future generations.

OUR VALUES

- 1) Deliver a **consistently high-quality** professional service and ensure that a **pro-active and helpful approach** is adopted.
- 2) Ensure a **high standard of scientific robustness** in our work.
- 3) **Support our colleagues** in their everyday work and promote opportunities for career development.
- 4) **Maintain our integrity** at all times and communicate openly.
- 5) Ensure **that health and safety is an integral** part of our day to day behaviour and operations.
- 6) Ensure that our actions contribute to the conservation and sustainable development of the natural environment.
